NOTES—First Sheet

File No of 193

General and Revenue Secretariat

Serial No

3/~~Sept~~ Sept 1931 A.S. The Hon'ble Member was good enough in a position to take up an early water supply scheme it was suggested in this Note, Bibliography and 2-1503/and 293-28-2 dt 6-8-30 that the proposed "bore holes" may be tried in suitable places and the result reported to Govt.

80

a/ 2nd Sept 1931 the Secretary Engineering Institute submitted a scheme of water supply involving the use of 14 Tube wells and costing Rs 62460 the writer requested that they it may either be granted or permitted to float a loan of Rs to borrow for the scheme, repayable in 25 instalments at a rate of interest not exceeding 6% per annum, that the extra payment by Govt may be granted early. The Secy. Engg recommended that the loan of Rs borrow may be granted as the finances of the municipality were fairly satisfactory Thereupon the municipality was informed that if it was willing to, and could float a loan and could wait for the receipt of the Govt grant till such time as Govt could afford to give it there was no objection to it being permitted to raise a loan, and the municipality was required to submit specific proposals in respect of the loan as regards repayment of interest, period of repayment of loan etc

Copy of

5) The Secy. Engg has now submitted a

NOTE—Contn Sheet

H Revenue Branch

3

2nd File No 256 37 1932

revised estimate for Rs 46 crores for the water supply scheme, excluding the supervision works and plant charges. He calculated may revised

that half the cost of the scheme may be borne by Govt that if it is not possible to contribute this amount in a lump, the concil may be permitted to float a loan of Rs 40,000 at 6% interest, free of income tax, redeemable in 20 years, and that the Govt may pay three contributions at Rs 5000 per annum for 4 years and Rs 3000 in the fifth year. It is proposed to meet the annual recurring charges of Rs 4,000/- by levying a water rate at a flat rate of 2½% on the income from taxes on Buildings & lands

6) on account of the already existing commitments under the water supply Govt for this year, it may not be possible for Govt to contribute anything towards the scheme this year

7) The proposals for the floating of the loan are on the conditions specified above.

(Page 4 contains minute at para 21 in the file 293-29 Misc)

Sec CB 7/3 a/s

8 --- The proposal is to raise a loan of Rs 40,000 at 6% interest, free of income tax with Govt Guarantee, the period of repayment being 20 years

9 --- The amount required for payment towards the loan is proposed to be provided annually by setting apart the income from Daily & Weekly Market fees for this purpose

a fourth of the amount from Rs 10,000 being 2 charges at the end of every 5 years

Serial No

The income from this source is stated to be Rs 2500 per annum. State A sent with the papers shows the details of payments to be made every year until the discharge of the loan. It shows that the realisations from market fees will be utilised for payment of interest on the loan for the first 5 years & that the repayment of Rs 10,000 at the end of this period is to be made out of the amounts received from Govt during the period towards their contribution. Thus the calculations are made on the assumption that Govt are meeting half the cost of this Scheme viz Rs 5,000. & that they are going to pay ~~one moiety~~ give this year contribution of Rs 5000 in the shape of cast iron pipes from New Iron Works & the balance of Rs 5000 for the next 3 years and the remaining Rs 3000 in the fifth year. There is no money available out of this years grants to be spared for the work and if the pipes are to be supplied, as proposed, this year, Govt will have to pay next year Rs 5000 to the Iron Works & Rs 5000 to the Municipality or Rs 10,000 in all. The usual Water Supply Grant ~~which~~ provided in the Budget however Rs 25,000 ~~is~~ it is not possible to give Rs 10 000 out of this for this work alone, as there are other commitments already made such as the payment towards the Nandiere Water Supply

—10— Regarding the annual Maintenance charges estimated at Rs 4000, it is stated that the Municipal Council will meet them from the Water tax proposed to be levied & the means from house connections

11 The amount of the estimate is Rs 46,000 and this does not include the charges on account of establt and tools and plant (18% of these charges

NOTE—Contn Sheet

WD 70—GBPM—50 000—13 8-31

5

8281

File No 256 of 1932 — General and Revenue Secretariat

are included the total amount of the estimate will come to Rs 46,000 + 8280 = Rs 54,280/- Does perhaps the idea to ask Govt to waive the charges. Nothing is stated about this in the Govt letter or in the resolution of the Muni Council. It is not also stated however that charges are waived; the sum of Rs 6000 required on the amount of the loan to be raised is to be met. Perhaps the Muni proposes to pay it out of their balance

File No | of 193 | General and Revenue Secretariat

20 Subd - with reference to paras 14 & 15. The Sanitary Engineer has not dealt with the question of the financing of the Scheme & the proposal that Govt should meet half the cost. He has merely stated that the Govt Tools & Plant charges may be waived by Govt. These charges are not, as pointed out in para 11, included in the estimate.

21) The financial effects may now be calculated on the proposals of the Municipal Council for raising a loan on the terms suggested & for discharging the loan (including Rs 23,000 which is expected as contribution from Govt); vide paras 8 to 11.

(Financial effects) 7/4

Financial Secretary

22) The proposals of the Holenarsipur Municipality are that:- 9-4-33

(1) Government should meet half the estimated cost of the scheme, viz., Rs 23,000/- and if it is not possible for Government to pay the entire Government grant in one lump, the same may be paid in annual instalments of Rs 5,000/- each

(2) The Municipality be permitted to raise a debenture loan of Rs 40,000/- (with Government guarantee) on the following conditions.-

(a) The debentures will bear interest at six per cent per annum (free of income tax);

(b) The loan will be repaid in 20 years,

(c) Arrangements would be made for discharging

FC 2999/10-4-33

Serial No

discharging Rs 10,000/- once in five years, the bonds to be discharged being drawn by lot

(3) Provision will be made in the annual Budgets for discharging the debt, the income from daily and weekly markets being set apart for this purpose

(4) ~~In~~ The annual maintenance charges amounting to Rs 4,000/- per annum will be met from the extra income anticipated by the levy of water rate at a flat rate of 25% on the income from taxes on buildings and lands (Rs 600/-) and income expected from house connections (Rs 3,600/-).

23) In the revised estimate for Rs 46,000 now sent up, provision for the usual establishment and tools and plant charges is stated to have not been included The inclusion of provision for these authorised charges is necessary and the proposal to waive their recovery is not financially acceptable especially when Government are required to bear a moiety of the cost If provision for these charges is included, the amount of estimate would amount to Rs 54,280/- of which Rs 27,140 is payable by Government and the balance by the Municipality.

24) Whether it will be possible for Government to ~~xxx~~ allot at least Rs 5,000/- every year for the purpose out of the normal grant for the improvement of water supply in towns is for consideration A statement may be put up showing the commitments already made and expected to be made in future to see how far it will be possible to comply with this request In any case, as it has been definitely stated that the Municipality

A

NOTE—Contn Sheet

WD 70—GBPM—60 000—13-8-31

Municipality will have to wait till such time as Government is in a position to give this grant, it will have to advance in the first instance the necessary funds subject to recoupment later when the Government grant is given __ Whether it is in a position to do so and for how long it can afford to wait is to be stated. B

25) As regards the proposal to raise a loan from the public, it is to be stated that since the rate of interest offered appears to be high when compared with the present market rate, it is not desirable, as a matter of policy, to exempt it from income tax

26) The proposal to repay the debentures in lots once in five years will make the loan unattractive and may not be accepted It appears sufficient if option is retained with the Municipality to repay the loan in full after ten years, giving three months' previous notice // The conditions of the money market having changed much during the last few months, it is for consideration whether it is not a better policy to give the Loan from Government Funds

27) A sum of about Rs 2,000/- on an average will have to be paid by the Municipality every year towards repayment of the principal and payment of interest, and in addition, maintenance charges amounting to about Rs 4,000/- per annum will have to be paid

28) From the Budget estimates of the Municipality for 1932-33 it is seen that the receipts and expenditure are almost the same and there is not much margin for extra expenditure in the present Revenues It is not

Rotenainpur water supply.

Def-memo submd

5/7 Issue 5/7

Memo no 15-3 dy 7-7-33

Letter no C-30787 4/33 from the Dy Secy inviting early orders in this matter

~~Letter no open 15732-33 dy 6-7-33 from the Dep Secy, Hsmm to forwarding the budget estimates of the Hollenarsipur muni for 1933-34~~

The budget has been rec'd and it has been subd separately with a draft-review.

A Scrutiny of the budget shows that the normal income of the Mlty is in excess of the normal expe by Rs 1500/- and that, if the revision of assessmt on buildings is completed the surplus is expected to amount to Rs 2000/-

8263

Serial No

This amount is sufficient for repayment of the principal & for payment of interest on the loan proposed to be taken by the mc cl (vide para 27 of the notes above) In addition to this, the mc cl will have to find a sum of Rs 4000/- for the Annual Maintenance charges. This is proposed to be met by the levy of a flat rate of 25% of the house tax as water tax and in addition to this a sum of Rs 3600/- is expected to be realised from house connections. The resoln of the mc cl dt 18.12.32 item (11) shows that 300 house connections at least will be taken and that the rate of Rs 12/- for each connection, a sum of Rs 3600/- is expected to be realised.

39 The estimate sent with the records shows that provision has been made therein for a sum of Rs 10,000/- only for providing distribution lines and for providing 30 taps. The Sanry Engr may be consulted as to whether it is possible to supply water for 300 house connections by working out the estimate now sent. If this is not possible the income expected may not be realisable at all. After obtaining information on this point, the Dc. may be consulted if necy, as regards the number of house connections

Forwarded with compliments to the Sanitary Engineer for favour of information and early return with his remarks

Govt wish to know, whether it would be possible to provide 300 house connections in addition to 30 public taps, on the Rs 10,000 estimate for deep boring. The Govt hopes to realise Rs 3600/- annually from private house connections

for Director of Health
1/8/33

Serial No.

44 returned with compliments to the Sd of H.

As a matter of future policy in regard to Water supply schemes and Govt contributions thereto, I would recommend that Govt discontinue its policy of granting one half the total cost of the scheme. In future, Govt may make a grant of one third the total cost of the scheme and include in its third the I & D Works, and Plant Charges.

In the case of Hubli Ranibennur, Govt share would be 1/3 of Rs 5-4,280 or 18,090, less cost of Works and Plant charges, Rs 8,280, leaves a grant from Govt of Rs 9,810 Govt may grant Rs 5,000 this year and the balance next year.

45 The scheme for Hubli Ranibennur as designed provides all main features of the plant for the final scheme. The plant is capable of supplying water to 500 house connections in addition to the public taps Thus would be no other charges to the Municipality as house owners will be required to link up with the present system of distribution

J Macnaughton

c1039-8 ans. 6 file
11-8-33

(4b) Retransmitted with compliments to the General Secretary to Government with remarks of the Sanitary Engineer.

(5) In para 3 of his Note he states that the scheme as designed provides for all main features for the final scheme and it is capable of supplying water to 300 private house connections, besides the public taps. As house owners will be required to pay for linking up the public mains with their houses, the Municipality will not be committed to any extra charge on this account.

(6) In this connection the Sanitary Engineer suggests the policy for the future as regards grants. He recommends that Government contribution be limited to 1/3rd of the total estimated cost. This contribution will include the 18 per cent tools and plant charges. On this basis the nett Government contribution to the Holenarasipur scheme will be Rs. 9,810/- of which Rs. 5,000/- to be paid the 1st year and the balance the second year.

GENERAL SECRETARY
14 AUG 1933
No. R S 9

I am in agreement with the recommendations of the Sanitary Engineer. If Government approve of the same, it would be possible to help larger number of water schemes than at present.

Director of Health.

50 The Deputy Com's letter under Disposal Contains the proposals of the Muni Council of Holenarasipur made on the basis of Govt bearing half the cost of

Serial No

the scheme, in addition to warring the charges on account of the establishment and tools & plant.

5/ The recommendation of the Sani Engineer is that Govt should contribute one-third of the total cost of the Scheme, viz 54280, including in that portion the charges on account of Establ & Tools & plant. On this basis, he says that the amount which Govt has to bear is Rs 18090 & that deducting out of this the sum of Rs 8280 for the said charges, the sum actually payable will be Rs 9810 which may be paid in two years — Rs 5000 this year & the balance next year.

5-2 If the Sani Engineer's proposals are accepted, the amount which the Municipal Council will have to bear will be Rs 36,180 Whether the Muni Council are prepared to raise this sum & pay it over — either in open market or from Govt — will have perhaps to be ascertained before proceeding further in the matter.

5-3 If on the other hand the proposals of the Muni Council are to be sanctioned, the file may be referred to the Sani Secy again with reference to his note D/15.6.33 The points mentioned at A, B & C in his note are dealt with in the subsequent paragraphs.

Yours

NOTE—Contn Sheet

17

MC File No 256 of 193 — General or Secretariat

55 It will be seen from the note of the L.S G. Branch that the Municipality will be able to meet the maintenance charges as also the interest on the loan to be raised by it, from the Revenue now realised or expected to be realised The points for consideration are:-

(1) Amount of Government grant to be given and when it should be given

(2) How the cost of the work (including Government quota remaining unpaid) has to be financed,

56 Regarding (1) it has to be stated that in the present financial condition it will not be possible to allot for future years a larger grant than that allotted in the current year's Budget and that the water supply schemes in the several places should be sanctioned according to the relative needs of urgency at various places, keeping in view the total annual grant permissible

57 Grant for each work should not exceed half (or such lesser percentage ~~which~~ as may be prescribed) of the total amount of the estimate, including the usual provision for Establishment and Tools and Plant charges which should not be waived but should be got adjusted in the accounts in the prescribed manner.

58 The question of allowing the Municipality to raise a separate public loan is a matter of Policy. Personally, I think, that it will be more expedient ard in the interests of the Local Body for it to get a Loan from Government rather than separately raise a public loan.

59 Since however we have already sanctioned loans

126

18

Serial No

H 512

to some Local Bodies which are likely to result in a.. excess over the Budget provision of Rs 10,96,000 during the current year, it may not be ~~possible~~ feasible to consider the grant of further advances during the current year, unless the grant of such loans and advances is inevitable immediately

1933

GENERAL SECRETARY 4 SEP 1933 No

(Secretary) 60 29

61 The Sanitary Engr has proposed a general rule that only 1/3 cost of such projects shd be paid by Govt, after deducting therefrom the usual Establt & tool and plant Charges. This may be followed in this case

I think it desirable that such small local bodies should borrow from Govt rather than raise a loan in the open market. If this is accepted, the scheme can easily be considered next year as soon as the Final Survey

Second Member of Council 5 SEP. 1933 No 13.01.

79 The loan may be required to be repaid in 10 to 15 years. Interest at 5½% per annum may be levied on it. In this connection, I may state that the rate of interest charged by the Madras Government on loans to Local Bodies is higher, being 5¾ % per annum

9 11.33.

The Municipality may be required to make suitable provision in their Budgets towards the repayment of the principal and the payment of interest.

81 If the Municipality is agreeable to receive a loan on these conditions and to receive the Government grant in annual instalments of Rs 5000/-, the work may be sanctioned this year.

82 It is doubtful whether the Bangalore City Municipality will be drawing the entire loan of Rs 9 lakhs sanctioned to it this year and if they do not draw the entire loan this year, it may be possible to meet the present loan out of the current year's grant.

of interest now allowed by us on Call and Short-term deposits We cannot also offer a low rate now, based on present market conditions, as we will be bound by it and cannot increase it later if the market rates go up The rate of interest on loans to Local Bodies was fixed at 7 per cent in G O.No. R.11030-41/Munl 201-20-1 dated 4th April 1921

90 The loans and fixed deposits raised by us in the past and still remaining undischarged carry interest between 5 per cent and 6½ per cent and the ~~total~~ average rate of interest paid by us on all the outstanding loans etc works up to more than 5½ per cent on an average. The rate of interest on loans advanced by us should not merely cover the interest charges which we pay but also the charges incurred in the administration of the debt, the incidental losses on account of write off in bad cases & concessions shown in individual cases in the shape of waiving the recovery of interest and charging reduced rates of interest etc.

91 In Madras, interest at 5½ per cent is still being charged on loans to Local Bodies The Conversion loan at 4 per cent recently issued refers only to Savings Bank Call Deposits and the 4 per cent Fixed Deposits and is on a limited scale and leaves unaffected the bulk of our indebtedness carrying 5½%, 6¼% and 6½% interest. Even if we offer conversion terms for them, the basis & for such conversion is that we should offer the holders the interest they would have got till the maturity of the loans i.e., the benefit of the reduced rate in regard to them will not accrue to us for many years to come, i.e., 5 years at least.

92 In these circumstances, I think that the rate of

Hon'ble Minister's Weekly Letter
2005

25

Serial No

of 5½ per cent suggested by Mr Raghavachar is the minimum rate that we can charge to Local Bodies without incurring loss. Personally, I think it ought to be higher as several Local Bodies will default and as many of the Concerns on which we have invested ~~share~~ loan money, are not paying.

Final Note by the Second Member of Council.

Subject:—

Proposal for financing the Water Supply Scheme for Hole-Narasipur Town.

The question of a Water Supply Scheme for Hole-Narasipur has been under consideration for some time past, but owing to the depleted condition of the finances of the Municipality, its consideration had to be postponed for some time. The Deputy Commissioner, Hassan, has now forwarded a scheme costing Rs.54,280 and request that it may be sanctioned, the amount being met by a grant of Rs.23,000 from Government, the balance being borne by the Municipality by raising a loan.

It is now proposed to accord sanction to the scheme, the contribution from Government being restricted to one-third of the estimated cost, viz., Rs.18,000 payable from next year in annual instalments of Rs.5,000. For meeting the balance of the estimate, it is proposed to sanction a loan of Rs.40,000 to the Municipal Council carrying interest at 5½ per cent. and repayable in fifteen annual instalments.

Pages 27 & 29 Office Notes

The Dewan and the First Member of Council have agreed to this proposal and it may be graciously sanctioned.

OFFICE OF THE DEPUTY COMMISSIONER,
HASSAN DISTRICT,

Dated, Hassan, the 27th February *1933.*

GEN & REV SECTT 3781 2 MAR 1933 L.S.C BRA

FROM H. V. RANGASWAMI, Esq., M.A., B.L.,
Deputy Commissioner, Hassan District

To

R. RANGA RAO, Esq., B.A., B.L.,
General Secretary to Government,
Bangalore.

SIR,

GENERAL SECRETARIAT 1-MAR 1933 A SS

961-7 B J

With reference to your letter No. L. 2329/Ml. 293-29-7 dated 23rd September 1932, re. the water supply scheme to Holenarsipur Town I have the honor to state as follows -

The Executive Sanitary Engineer, Bangalore has furnished a revised estimate for Rs. 46,000/- for the water supply scheme by pumping water from the Hemavathi River. The above sum does not include charges on account of supervision, plant and tools.

The Municipal Council who were requested to furnish their views in the matter, have resolved at their meeting held on 24th Decr 1932 that the suggestions of the Special Sub Committee, constituted for the purpose may be approved and that the Government may be moved to sanction their recommendations. The Special Committee have resolved as follows -

Initial expenditure - Rs. 46,000/-.

(1) That Government may kindly bear Rs. 23,000/- and that if it is not possible to contribute this amount in a lump, the Council may be permitted to float a loan of Rs. 40,000/- at six per cent interest free of income tax (with Government guarantee).

(2) That Government may pay their contribution at Rs. 5,000/- per annum

542 [illegible]

for 4 years and Rs. 3,000/- in the fifth year;

(3) that Government may pay their first year's contribution in the shape of pipes manufactured at Bhadravathi and that if Government agree to this proposal, a sum of Rs. 1,000/- may be paid out of Municipal funds for this purpose;

(4) That necessary provisions would be made in their annual Budgets for discharing this debt, the income from daily and weekly market being set apart for this purpose;

(5) that the Debenture Bonds may be permitted to be of the value of Rs. 25/-, Rs.50/-, Rs. 100/- and Rs. 500/-;

(6) that the half yearly interest on these bonds may be permitted to be paid in April and October every year;

(7) that arrangements would be made for discharging Rs.10,000/- once in 5 years, the bonds to be discharged being drawn by lot;

(8) that the loan may be permitted to be reraid in 20 years;

As regards, the annual recurring expenditure of Rs. 4,000/-, the Sub Committee have resolved that the Council may provide for them by levying water rate at a flat rate of 25% on the income from taxes on Buildings and lands which will yield Rs. 800/- and by means of providing house connections which is expected to yield an income of Rs. 3,600/-. They are also hopeful of realizing a much larger income if Holenarsipur is made a Railway watering Station.

The President reports that if this much income is realised, there would be no difficulty for meeting the usual recurring expenditure and maintaining the prescribed closing balance.

The entire correspondence received with the President's report No. H.C. 36-32 dated 24th December 1932 is herein enclosed for kind perusal.

I request you to be so good as to move the Government to kindly meet half the estimated cost of the Scheme, and permit the Municipal Council to raise a debenture loan of Rs. 40,000/- on the conditions set forth in their resolution and enable them to provide water supply to the town at a very early date.

I have the honor to be,
S i r,
Your most obedient servant,

Deputy Commissioner,
Hassan District.

13.2.34

SIR,

With reference to your letter No. L.4014/M1,256-32-4 dated 13-12-1933, enquiring whether the Holenarasipur Municipal Council are agreeable to obtain a loan of Rs 40,000/- from Government on the conditions mentioned in your letter, I have the honour to forward herewith the correspondence ending with report No. H.C.36-22 dated 18-1-1934, from the President, Holenarasipur Municipal Council, on the subject, and to state as follows:-

2 The Council have resolved at their meeting, held on 7-1-1934 that they are agreeable to obtain the loan of Rs 40,000/- at Five and a half per cent per annum, and also to repay it in fifteen Annual instalments and that they would provide the necessary funds for discharging the principal and interest in their annual budgets. The President having submitted this resolution, he was asked to report whether the income from any particular source would be earmarked for discharging the loan with interest. He has furnished an extract from the proceedings of the meeting, held on 17-1-1934, wherein the Council have resolved that the income from the weekly and daily markets and the shop and cart tax, amounting to about Rs 3500/- might be earmarked for this purpose, that this will not affect the normal activities of the Council and if any amount is required to be paid in excess of Rs 3500/- the same might be paid out of the yearly surplus. The President has also requested that Government might be pleased to order the supply of pipes valued at Rs 5000/- from the Bhadravathi Iron

P T O

Bhadravathi Iron Works and that the Council would meet Rs 1000/- [redacted] of the closing balance to make up Rs 6000/- required for starting [redacted] work.

3 The Council have already resolved at their meeting held on 21-12-1932, that they would provide for the recurring expenditure by levying water rate and by providing house connections.

4 In view of the fact that the working of the municipality, satisfactory, I think that they may be granted the loan of Rs 40,0[redacted] referred to above, on condition that they ear-mark their revenue from Monthly Market, instead of the income from the markets &c., which are fluctuating items. I may add that the average income from 'Kohat[redacted] is also about Rs 3,500/-.

I have the honour to be,

Sir,

Your most obedient servant,

[signature]

DEPUTY COMMISSIONER,

HASSAN DISTRICT.

I.S.D.

Proceedings of the Govt. of H. H.
the Maharaja of Mysore.

Read -

Letter No.C 307-31 dated 27th February 1933 from the Deputy Commissioner, Hassan District, forwarding for sanction a revised estimate for Rs.46,000/- for a scheme of water supply to Holenarsipur town, excluding establishment, tools and plant charges.

2. Correspondence ending with letter No.C.1543-33 dated 10th February 1934 from the same officer on the subject.

Order No. 7192-97 Jud 258-32-6.
Dated 5-4-34

The estimate, with the addition of the usual charges on account of establishment, tools and plant, amounts to Rs.54,280/- and is sanctioned for this amount.

2. Government are pleased to contribute one third of the estimated cost viz., Rs.18,000, which will include the sum of Rs.8800 on account of establishment, tools and plant charges, the grant being given in annual instalments of Rs.5,000 and commencing from next year. The balance of the estimate will be met by the Municipal Council for meeting the Municipal share of the cost. Government are pleased to sanction a loan of Rs.40,000 to the Municipality subject to the following conditions -

(a) The loan will carry interest at 5½% and ~~it~~ be repayable in 15 equal annual instalments. The Comptroller will intimate direct to the Municipality the amount of the annual instalment on account of principal and interest.

(b) The Municipal Council will make suitable provision in its budget towards the repayment of the principal and interest, earmarking its annual revenue from Mohatarfa for meeting the loan instalments.

3. It is requested by the Bal Council that pipes costing Rs.5,000 may be ordered to be supplied fro the Bhadravati Iron works. The Deputy Commissioner may, in consultation with the General Manager, Bhadravati Iron orks, Sanctioned by Engr. arrange to obtain the pipes from them and adjust their ~~value~~ price out of the loan or out of the Government contribution for next year

4. The Municipal Council will, as already resolved on, then, take necessary action for providing the annual recurring expenditure on the scheme by levying water rate and providing house connectio
